EXPERIENCE

Branch

Feb. 2023 - Present (6 mos)

Backend Software Engineer

San Francisco, CA, USA

- Worked closely with data scientists at Branch, a mobile marketing company, to synergize backend systems that underpinned revenue generation strategies.
- Implemented end-to-end solutions, optimizing performance for data-intensive workloads.
- Developed tools for data collection, processing, and visualization to enhance insights for the mobile SDK, enabling targeted ad displays across various mobile manufacturers.

Ualá

Jun. 2022 - Feb. 2023 (8 mos)

Backend Software Engineer

Buenos Aires, Argentina

- Led the development of a new loan platform on Amazon Web Services (AWS), collaborating with cross-functional teams and intermediaries.
- Utilized Java-based AWS Lambdas and Terraform for infrastructure creation, while implementing streamlined development and enhanced collaboration through GitHub Actions for continuous integration.

Vantek

Jun. 2021 - Jun. 2022 (1 yrs)

Technical Lead

Buenos Aires, Argentina

- Coached and mentored new developers, including those new to the IT industry, at Vantek, a specialized software development company serving brokerage houses in Latin America.
- Led end-to-end development of a mobile app project using Ionic and Angular, demonstrating expertise in project management and modern frontend technologies.

Vantek

Jul. 2019 - Jun. 2021 (1 yrs 11 mos)

FullStack Software Engineer

Buenos Aires, Argentina

- Managed multiple products, handling backend with Java and Spring framework. Also, contributed to frontend using JavaScript and Angular 7.

Keepcon

Nov. 2017 - Jul. 2019 (1 yrs 8 mos)

FullStack Software Engineer

Buenos Aires, Argentina

- Collaborated on an NLP engine's configuration tool for social content moderation, predominantly using Ruby and JavaScript. Developed features and maintained the hosting server.

Codementor

Jun. 2018 - Oct. 2018 (4 mos)

FullStack Software Engineer

Buenos Aires, Argentina

- Mentoring and freelance software development.

Lumina Americas

Feb. 2014 - Nov. 2017 (3 yrs 9 mos)

FullStack Software Engineer

Buenos Aires, Argentina

- Developed and maintained the company's main Java-based client-server product, involving both frontend and backend components.
