Gonzalo Alvarez

Software Engineer

I like challenges of all kinds related to software development. My experience is mainly on web development, both backend and frontend, although in the latest years I've worked mainly in the backend.

EXPERIENCE

Backend Developer @ Ualá
Jun. 2022 - now (7 mos)

I am currently engaged in the creation of a new platform for the company's loan offering. This platform is being developed on Amazon Web Services, utilizing Java-based AWS Lambdas and infrastructure created with Terraform. To streamline our development process, we are also utilizing GitHub Actions for continuous integration.

AWS Serverless Terraform Java

Technical Lead @ Vantek
Jun. 2021 - Jun. 2022 (1 yrs)

Vantek is a software development company that specializes in serving brokerage houses in Latin America. My role within the company included coaching and mentoring new developers, many of whom were new to the IT industry. I also had the opportunity to lead a mobile app development project from start to finish, using Ionic with Angular to create the app.

Angular Coaching Leading Ionic Java

FullStack Engineer @ Vantek
Jul. 2019 - Jun. 2021 (1 yrs 11 mos)

As part of my responsibilities at the company, I was responsible for the development and maintenance of various products. This included working on the backend of one product, which was written in Java and built using the Spring framework. I also had the opportunity to work on the frontend of another product, which was written in JavaScript and based on Angular 7.

Bash Ionic Java Spring Angular PostgreSQL

FullStack Developer @ Keepcon
Nov. 2017 - Jul. 2019 (1 yrs 8 mos)

As a member of the company's research and development team, I contributed to the creation of a configuration tool for an NLP engine used for social content moderation on platforms such as Facebook and Twitter. My responsibilities included developing new features for the tool and maintaining the server hosting the application.

Ruby on Rails Vue.js Ruby PostgreSQL

Software Developer @ Codementor
Jun. 2018 - Oct. 2018 (4 mos)

Mentoring and freelance software development.

Ruby Ruby on Rails Algorithm Design Python Java SQL

Software Developer @ Lumina Americas
Feb. 2014 - Nov. 2017 (3 yrs 9 mos)

I was involved in the development and maintenance of the company's main product, a client-server application built in Java with an Oracle database. My responsibilities included performing maintenance tasks and adding new features to the product, which included both frontend and backend components written in Java.

Java Spring Swing Oracle PL/SQL

EDUCATION

Software Engineering @ Universidad de Buenos Aires
Mar. 2015 - now

PROJECTS

Ophrys

Cryptocurrency trading automation. Designed mainly to be adapted to any market. The main motivation was to explore Golang.
